

### Practical Assignment P2024B-02

Due: 31 July 2024, 08:00

### INSTRUCTIONS/WARNINGS

- Solution Naming Convention: S(Student Number)\_P(Practical number), Eg. S202112345\_P02

### QUESTION

Create a simple web page that represents the home page for a B2C electronic commerce website such as <http://www.takealot.co.za>, <http://www.loot.co.za>, or <https://raru.co.za/>. Your design has to make use of all the HTML tags specified below. The webpage should show at least 5 products. Each product's name and image should redirect to that product's about page, where the price, image, description, and rating can be seen.

You are not allowed to use templates for this practical. Do not use any local images, they should all be referenced from online.

You must use:

- Bold, Italic, and Underlined text
- Ordered and unordered lists (Ordered and Unordered)
- At least five images
- A table
- Two different type of headings
- Horizontal line

### MARKSHEET

Description	Marks
Design <ul style="list-style-type: none"><li>• No clashing colors - using two primary colors e.g. Red text on a blue background</li><li>• Use of color - not just white and blue</li></ul>	20
Proper HTML – correct tags	20
All elements used correctly	5
About Product Page	20
Page renders correctly	5
<b>Total</b>	<b>70</b>
